ABOUT ME

I am a Full Stack developer with about 8 years of experience in web development. Currently, I'm Located in Warsaw, Poland and working as a Full Stack developer for TheBouqs - a subscription-based flowers delivery service.

I'd say that core of my experience includes Rails, React and Typescript but through the years I've worked on a bunch of different languages and technologies so I consider myself being able of picking up any new one quite quickly. So, I do not really pursue any specific tech stack. The idea behind a project is much more crucial for me than its implementation.

In June 2022, I took a 6-month break from work because I was feeling burnt out and uncertain about my future career. Fortunately, I made a full recovery and realized that I can actually be helpful to people who want to build something cool and useful. Or maybe build something like that myself.

WORK EXPERIENCE

TheBouqs

Feb 2023 - Present

Full Stack Developer

- Maintaining existing legacy codebase in both frontend and backend.
- Configuring third party intergrations - Segment, Kameleoon, ABTasty, Sailthru, AvaTax, internal APIs.
- Configuring docker, Jenkins jobs, Cloudflare caching/workers.
- Conducting interviews, leading onboardings, gathering documentation.

Main achievements:

- Migrated NextJS version from 12 to 15 and React version from 17 to 19.
- Built the core logic behind fetching and rendering custom data from Contentful API.
- Configured serverless deployment to a Cloudflare worker for a NextJS application.
- Multiple third party services integrated - ABTasty, Kameleoon, internal ERP API.
- Overall improvement of code quality and developer experience.

Technologies stack:

- Ruby, Ruby on Rails
- Typescript, ReactJS, NextJS, jQuery
- SCSS, Styled Components, Chakra UI
- Webpack, Rollup
- Docker, Jenkins, Cloudflare, AWS
- MongoDB, Elasticsearch
- RSpec, Jest, React Testing Library
- Sentry, NewRelic

StashAway

Oct 2020 — Jun 2022

Full Stack Developer

- Implementing Admin interface for CX team.
- Maintaining API for Admin panel.
- Leading sprint plannings, retros, daily meetings

Main achievements:

- Supported, extended and refactored existing Admin ecosystem.
- Provided a bunch of different interfaces for CX team allowing full customer support during any feature launch.
- Built a couple of POCs for a new version of Admin using micro frontends approach via webpack module federation.

Technologies stack:

- Scala, Kotlin, Play Framework
- JavaScript, ReactJS, NextJS
- IBM's Carbon Design System, @vanilla-extract/css
- Webpack
- MongoDB, PostgreSQL
- JUnit, Jest
- Sentry, Datadog

Saleswhale

Oct 2019 — Aug 2020

Backend Developer

- Mainly working on the backend part of the application.
- Refactoring, supporting legacy code.
- Participating in design sprints.
- Mentoring

Main achievements:

- Complete refactor of errors handling across legacy codebase. As a result, a considerable (~90%) decrease in unhandled exceptions rate.
- Refactored logging and monitoring services which led to 20% decrease in MTTR.
- Complete refactor of a microservice that was used for communicating with third-party services. Resulted in codebase size being reduced by 40%, while maintaining the same functionality.

Technologies stack:

- Ruby, Ruby on Rails, Sidekiq
- Docker, Cage, AWS, Terraform, nginx
- PostgreSQL, redis
- CircleCI, Honeybadger, Datadog

Shoptagr

Oct 2017 - Sep 2019

Full Stack Developer

- Implementing UI interfaces.
- Implementing REST API endpoints.
- Integrating different search engines and third-party services.
- Database optimization.
- Mentoring.

Main achievements:

- Built a second version of an existing application from scratch.
- Entirely new frontend and backend codebases with full specs coverage.
- Found a critical security issue in the legacy authentication process.

Technologies stack:

- Ruby, Ruby on Rails, Grape, Sidekiq
- JavaScript, ReactJS, react-virtualized, Redux, Redux-Saga
- Docker, Portainer, AWS, HAProxy
- PostgreSQL, redis, Elasticsearch
- RSpec, Jest
- Travis CI, Azure Pipelines, Bitrise
- Newrelic, Rollbar

Rubyroid Labs

Feb 2017 - Aug 2017

Backend Developer

- Fixing bugs.
- Supporting legacy code.
- Developing some basic functionality for web applications.

Technologies stack:

- Ruby, Ruby On Rails
- JavaScript, jQuery
- HTML, CSS
- Capistrano
- PostgreSQL, MySQL

EDUCATION

**FACULTY OF COMPUTER
SYSTEMS AND NETWORKS**

Sep 2014 - Jun 2018

Belarusian State University of Informatics and Radioelectronics
Bachelor’s Degree

OTHER

Languages

- Russian (Native)
- English (Fluent)
- Polish (Basic)
